# FULL-SERVICE STAFFING & MANAGEMENT

---

Keystone Healthcare Partners™ (Keystone Healthcare™) is a leading provider of Emergency Medicine, Hospital Medicine, CCU/ICU, and Nursing Home physician staffing and management services for hospitals.

We efficiently deliver high-quality, patient-centered care through strong physician leadership and involved management that drive our innovated and integrated business model and performance metrics.

## WHAT YOU GET WITH KEYSTONE HEALTHCARE

Innovative & integrated  
business model

The team you want for strong  
physician leadership

The metrics that matter for patient  
outcomes and financial success

## HOW WE WORK WITH YOU

We use your metrics to design a  
staffing model customized to your  
hospital's unique needs

We prioritize appropriate status  
for your hospital's observations  
& admissions

We share risk in the performance  
of your program

# LOCUM TENENS STAFFING

---

Keystone Healthcare is your preferred partner for emergency and hospital medicine locums staffing. Whether it's filling short-term gaps, supporting seasonal fluctuations, or long-term staffing solutions, our comprehensive network of dedicated professionals is here to meet your demands.

Our commitment to excellence ensures that your staffing needs are met with precision, allowing you to focus on delivering exceptional patient care.

## WHY DO HOSPITALS CHOOSE KEYSTONE?

Unparalleled Expertise, Seamless  
Quality of Care

Regional Focus

Competitive and Reliable

# TELEHEALTH & AI

---

KEYSTONE OPTIMUM &  
KEYSTONE CONNECT

We believe Telemedicine is no longer the future, but plays a mission-critical role NOW in emergency medicine and hospital medicine. Our telehealth services supplement your emergency medicine and hospital medicine departments, enabling more patients to receive care in a timely manner.

It's not just about having the technology, it's about having an engaged partner to architect telehealth solutions that impact patient outcomes, patient satisfaction, and ultimately your bottom line. Keystone Healthcare™ has experience implementing telehealth solutions in low-volume rural settings and across high-volume large health systems with shared telehealth resources. No two solutions are the same, and we have developed the infrastructure necessary to build custom solutions based on your hospital's needs.

# KEYSTONE OPTIMUM

Uses virtual Tele-Triage and Tele-ED to optimize clinical workflows in the Emergency Department

Improves capacity and surge management in both low- and high-volume settings

Reduces LWOT and TTP

# OUR TELEHEALTH SERVICES

# KEYSTONE CONNECT

Drives patient engagement using AI technology

Shown to double and triple response rates as compared to traditional methods

Has proven success at increasing patient satisfaction and reducing readmissions and CMS penalties

# OUR VALUES

Team players

Pragmatic

Respectful

Accessible

Integrity
