What You Get With Keystone Healthcare™

The Integrated Approach You Need For Emergency & Hospitalist Services

With so many moving parts in a hospital, we focus on EM & HM integration, management, and patient throughput. Our innovative business model integrates recruiting, orientation, scheduling, compliance, evidence-based practices, and efficient EM & HM patient flow. It ensures everyone in your hospital is aware of and empowered by the significant role they play in the delivery of quality outcomes, patient experiences, and financial success.

The Team You Want For Strong Physician Leadership & Management

Partnering with us means reinforcing your organization with strong physician leadership and involved management that shares risk in the performance of your program. Meaningful, long-term partnerships with shared values are where we thrive, so our executive team works collaboratively with yours to deliver solutions that are aligned with your hospital's mission and culture. Accessible, engaged, and with a 98% physician retention rate, our team becomes an extension of yours to achieve new levels of success.

The Metrics That Matter For Patient Outcomes & Financial Success

The world of healthcare is driven by data and our innovative business model is specifically designed to capture every detail, monitor every metric, and ensure every clinician in your hospital knows the ins and outs of proper documentation. Through closed-loop systems, documentation education, comprehensive recruiting, and more, we use focused analytics to reduce error and improve patient and provider metrics that matter to outcomes and financial success.

How We Work With You

1

We Use Your Metrics to Design an EM & HM Program

2

We Prioritize Appropriate Status for Your Hospital's Observations & Admissions

3

We Share Risk in the Performance of Your Program
